

New management issues within the reformed Common Fishery Policy: implementation and socio-economic impacts

28th – 30th April 2015 - at University of Salerno, IT

NISEA Fisheries and Aquaculture Economics Research and DISES, Department of Economics and Statistics Sciences of the Salerno University are pleased to announce that the European Association of Fisheries Economists will hold its XXII Conference in Salerno from 28th to 30th April 2015.

The theme of the conference is “New management issues within the reformed Common Fishery Policy: implementation and socio-economic impacts”. The conference is intended to provide a forum for the dissemination of recent advances in capture fisheries and aquaculture economics and management and to promote discussion amongst researchers, managers, policy makers and other stakeholders in the fisheries sector.

Conference proceedings will be published as an e-book on a CD with ISBN. A prize will be awarded for the best student paper.

Themes and topics

We invite abstracts for papers on these topics:

- Fishing effort management
- Impact assessment of management plans and bio-economic models
- Fisheries economic dimensions of the CFP landing obligation
- Fishermen’s behaviour, economic entrepreneurship in a changing environment
- Fishery management: the bottom-up approach (the role of stakeholders)
 - Rights-based management approaches
 - Community-led local development (CLLD): new opportunities
 - Social dimension of fishery and role of small scale fishery
- Markets and marketing of fish products
 - Market benefits from eco-labeling/certification
- Competition between recreational and commercial fisheries and the resulting management dilemma: who is getting the fishing rights?
- Marine strategy: Economic Indicators for sustainability monitoring
- Best practices in aquaculture sector
- Economic data collection, new data needs and best practices
