

WP2 - Sustainability Objectives

WP2 Lead partner: Marine Institute (MI)

Other partners involved: vTI, AAU, DTU Aqua, HCMR, IFREMER, IREPA onlus, IoES, KTU, CEMARE, NUIG, UBO, AZTI Tecnalia, JRC.

WP2 Lead contact person: David Reid

Contact details of coordinator: david.reid@marine.ie

Summary

WP2 runs for 18 months and will thus finish mid-way through the project. It addresses the overall objective question of developing measures that are consistent with the overarching sustainability objectives of the EU, taking economic, ecological and social considerations into account, and that can provide consensus across different stakeholders from the fishing industry, processing sector or buyer organisations.

Objectives

1. Definition of high level (EU wide) sustainability objectives - Based on literature overview (including commission and NGO documents), analysis of policy drivers (CFP in particular, but including other directives e.g. Marine Strategic Framework Directive and Integrated Maritime Policy (IMP)), and consultation with high level stakeholder groups
2. Definition of operational sustainability objectives at the local level – Based on the outcome of Objective 1, and carried out through consultation with stakeholders via workshops and other media.

Tasks

Task 2.1 Definition of high level (EU wide) sustainability objectives

Task 2.2 Definition of operational sustainability objectives at the local level
